

Miac Limited

ENVIRONMENTAL POLICY

We at Miac Limited realise that:

Planned prevention or reduction of pollution is cheaper than curing damage after the event. It therefore makes sense to minimise waste and pollution to reduce long term cost, e.g. treat and recycle water rather than pay extraction and discharge cost.

Our policy starts from the consideration of the Company as part of the community and its impact locally. More widely by bringing in raw materials, use of energy, produce distribution and discharging emissions and wastes.

The Company, therefore, have the following commitments and objectives to:

1. Minimise disturbance to the local and global environment and to the quality of life of the local communities;
2. Fully comply with all relevant statutory regulation;
3. Maintain appearances and the highest environmental standards within the Company premise;
4. Take positive steps to conserve scarce and non-renewable resources;
5. Assess, in advance if possible, environmental effects of new processes and developments;
6. Provide necessary information to enable proper use, storage and disposal of Company products to avoid harm to the environment;
7. Provide necessary information to enable employees to operate processes properly and minimise the effects on man and the environment;
8. Keep the public informed of major new projects in the locality.

OVERALL

The development of the business having full regard to the environment and taking into account the view of all affected interest.

Where necessary the Company will provide for codes of good practice, which will reflect the environmental impact of the contact. This policy will be communicated to all employees.

ORGANISATION

The Managing Director has the ultimate responsibility for this policy and through the Management team and supervisors, will direct this policy to all concerned.
